

## SIGHT WORD SENTENCES LIST 6

Just to recap:

1. Once a child has learned how to spell the sight words in LIST 5, you can begin teaching him/her how to write and read these sentences.
2. The suggested time for each sentence is 2 weeks, spending one week on vocabulary and the 2<sup>nd</sup> week on the word family. Spend more or less time according to the child's progress.
3. The child should know how to spell all of the SIGHT WORDS in the sentence before moving onto the next sentence. The underline words DO NOT need to be spelled correctly to move on.
4. The underlined words can be replaced with different words to teach vocabulary.
5. The word families are there to teach a specific spelling pattern.

It's only four o'clock.
