

## Farm Equipment Safety Management

(Presented in English)

Serious agriculture employee injuries are often related to the unsafe operation of farm equipment. Effective instruction and monitoring are key to operating equipment safely.

### This session covers:

- Management best practices to address safe equipment operation
- Various types of farm equipment including: ATVs, RTVs, tractors, forklifts, and harvest aids/machines

### Who should attend this training?

Safety and Health professionals, business owners, managers, supervisors, crew leaders, and any employees with safety responsibilities.

(This complimentary webinar is offered to current Zenith policyholders and agents.)

Contact Jessica Neal at (559) 449-4836 or [jneal@thezenith.com](mailto:jneal@thezenith.com) with any questions.
