

Suncor Coke Boiler Replacement

Client	Location	Project	Value
Suncor	Suncor Base Plant, Fort McMurray, AB	Coke Boiler Replacement Natural Gas Pipeline	\$22.8M
Start Date: May 2019		Finish Date: June 2021	
<p>Project Description:</p> <p>OCL is the EPC General Contractor responsible for execution of the Coke Boiler Replacement (CBR) Natural Gas Pipeline Project.</p> <p>OCL has retained CCI Inc. (CCI) to conduct the Limited Notice to Proceed (LNTP) and Final Notice to Proceed (FNTP) engineering and procurement inputs. Construction of the 6km 16" pipeline will be executed by OCL. The LNTP inputs were kicked-off May 01, 2019 and completed August 15, 2019. LNTP inputs included FEED Validation, Pipeline Route Optimization, Horizontal Directional Drilling (HDD), Alternate Communications and Pipeline Shutdown Optimization along with an onsite Geotechnical Bore Hole Drilling program.</p> <p>Upon Suncor sanctioning the \$1B Coke Boiler Replacement project, OCL has since kicked off the FNTP portion of the contract. Detailed engineering and procurement inputs have begun and are scheduled to be completed by August 2020, with construction mobilization June 2020 and project completion June 2021. The OCL engineering project team is supported through our regional offices in Calgary, Edmonton and Fort McMurray, Alberta.</p>		 <p>Project Statistics:</p> <ul style="list-style-type: none"> Procurement: \$4.6M Engineering: 9,750 MH's Construction: 73,461MH's 1,500m Horizontal Direction Drill (HDD) Brown Field & Green Field Construction
