

Syncrude Gland Water EPC

Client	Location	Project	Value
Syncrude	Mildred Lake	Gland Water	\$1.2M
Start Date: August 2017		Finish Date: June 2018	

Project Description:

Currently gland water is being trucked from the 690 Pump House to existing RCW Line. Client required 1.75 km of HDPE piping from existing RCW line to 690 Pump House in order to eliminate the requirement for trucking.

OCL to design and construct piping system

- 3 light vehicle road crossings
- 1 heavy haul truck crossing
- Civil road work to upgrade access
