Product Description:

IP Business Line is a high-quality replacement for traditional, analog phone service that utilizes Session Initiated Protocol (SIP) technology. Instead of speaking over standard phone lines, you're communicating over an Internet Protocol network, allowing you to take advantage of the technology available to lower costs, enable better line flexibility and more easily manage your business' phone service needs.

EnTelegent gives you more than just a digital line to make and receive calls. Our IP Business Line supports between two and eight lines, so you can scale up or down depending upon the needs of your organization. Our online management portal lets you change and fine-tune the features of your phone service, including Caller ID, Call Waiting, Hunting, Voicemail, Call Forwarding and More. Calling Plans include Unlimited Local calling with optional unlimited domestic Long-Distance calling.

EnTelegent leverages best-in-class technology and service offerings, combined with aggressive pricing and a world-class support infrastructure, to provide industry leading managed communications solutions to the business community.
