

Voice – PRI

Availability:

EnTele-Voice PRI is available in most RBOC and LEC territories nationwide.

EnTelegent Partners with multiple carriers to provide a nationwide footprint for all your locations with great rates, all on one bill.

Capabilities:

- **DID Capability.** Allows incoming calls to reach a specific number served by a PBX without the use of a call attendant.
- **Call by Call Allocation.** Enables all 23B channels to be used for inbound and outbound call types at any time.

Product Description:

EnTele-Voice PRI delivers voice communications on a 100% digital connection to the customer's PBX. Inbound and outbound calling are combined on the same connection which maximizes efficiency and enables scalable growth. EnTelegent Solutions makes this leading-edge technology affordable for small and medium sized businesses.

- Digital T1 providing local and long-distance over a T1 connection to the customer's PBX.
- Primary Rate Interface - 23 Bearer Channels plus 1 DataChannel (23B+D)

Benefits:

Dedicated Trunk Groups - Bearer channels can be configured as stand-alone trunk groups. Trunk groups are dedicated to a specific type of voice service such as inbound or outbound.

Enhanced 911 - Allows the station DID number to be transmitted over the D channel which enables the caller's DID number to appear on the recipient's phone display.

Flexible - EnTele-Voice PRI enables your business to handle more calls on a single digital connection. Voice PRI can adapt as your needs change.

Efficient - Technology enables an efficient way to consolidate traffic from a PBX, reducing equipment costs.

Affordable - EnTelegent Solutions' competitive pricing makes this powerful technology affordable.
