

10th Annual Video Contest

It's Lights, Camera, Action for Your Chance to Win \$500 OR \$2,500 for Your Club or Class

Energy savings and conservation is an important first step in helping protect our environment for generations to come. And it starts with you.

So, get out your video camera and show us in a short video how you go above and beyond to save energy — for a chance to **win a cool prize!** Remember, creativity counts.

Our **10th Annual Kids and Conservation Video Contest** is open to high school students (13 years and older, including those who are home-schooled) within NJNG's service territory.

Here are the details:

- Students can participate in an individual or group project. NJNG will award the **individual video winner \$500** and the **group video winner \$2,500** for the students' club, class or group. Remember – it's a great project for your environmental, science, communications or drama club. The winning students' schools or home school associations will each receive a **\$1,000 contribution** from NJNG toward an energy conservation or environmental project.
- The videos of the top finalists will be posted on njng.com/education, where they will have a chance to win **\$500 in the Viewers' Choice award**.
- Videos should be no more than two minutes in length and **highlight natural gas energy** (such as heating, water heating and cooking) **conservation efforts or ideas**. Visit the Save Energy & Money section of njng.com for free resource materials for your video.

Check out examples of winning entries from previous years on our [YouTube](#) page. It's easy to participate. Contact Carolyn Cannon at 732-938-1035 or ccannon@njng.com to receive your starter kit via email. Video entries must be submitted to njngvideos@gmail.com to NJNG by November 30, 2020.

To get started, contact Carolyn Cannon, lead customer relations coordinator at NJNG, for your starter kit and complete contest rules. Good luck!
