

T&S Associates Now Offers XDry Humidity Controlled Dry Cabinets in the Southeast

DALLAS, TX — March 2021 — XDry Corp., a leading supplier of humidity-controlled storage cabinets for manufacturing, laboratories and preservation, today announced an exclusive representative agreement with T&S Associates LLC Sales Representation in the Southeastern US. James Trott and Chuck Steely will represent the complete line of humidity-controlled storage dry cabinets in the states of Alabama, Georgia, Tennessee and Mississippi.

“T&S Associates is very excited about our partnership and having the opportunity to present such an innovative and high quality solution to our clients in the Southeastern territory,” stated Steely.

XDry has been providing humidity-controlled storage cabinets for more than 15 years. The storage systems are self-contained and easy to maintain. There is no need for nitrogen or compressed air – just plug the cabinet into the wall and it is ready to go.

The dry cabinet environment can be maintained from ambient to 1% RH, providing constant and stable storage at precisely the required RH level. These storage dry cabinets satisfy standards such as IPC/JEDEC J-STD-033 and IPC/JEDEC J-STD-020.
