

Jacco Solves Temperature and Humidity Concerns at Akron General West Pharmacy

Akron General was faced with a challenge to find a rooftop unit for their pharmacy that could meet their strict performance and tight schedule requirements.

Not only was the unit 100% outside-air, but it had to maintain tight temperature and humidity control within the space to maintain the integrity of the medication.

Jacco and Aaon were ready to help and shipped a RQ packaged rooftop unit in two weeks with the following options:

100% outside air
Modulating gas heat
Electric heat

Modulating compressors
 Modulating condenser fans
 Modulating hot gas reheat
 MERV 14 filters
 Factory installed BACnet controller

Aaon delivers on time and performs!
