

## How can I add signatures to my purchase orders?

There are 2 ways to add signatures to your Senior Systems purchase orders.

1. You would send us a .jpg, .bmp etc of one signature that would print out on all purchase orders.
2. You could send us multiple signatures and the Senior Systems userid of the person it belongs. Whenever a purchase order is generated by that user, their signature will appear.

If you would like to move forward with this, you will need to contact:  
SeniorSystems-Custom@communitybrands.com and send them your files.
