

Manage any of your campus sales locations with Campus Store.

Maybe you just sell books. Maybe you sell a full range of clothing, snacks and spirit items as well. Maybe you also have cafeteria, snack bar or athletic store outlets you'd like to automate. From a single outlet to a multi-campus web, you need a system that can handle cash and charge transactions quickly and smoothly, keep track of inventory and integrate with point-of-sale technologies like touchscreens, magnetic stripe cards, barcode scanners and other technologies. You'll also need detailed history, sales analysis, inventory replenishment and reporting. Finally, the utility of these abilities is seriously curtailed unless that same system can integrate easily with accounting systems to facilitate charges to student accounts, purchasing, and posting sales and inventory to the general ledger.

Campus Store Features

- Seamlessly manage multiple locations and types of stores—bookstore, cafeteria, athletic store, snack bar, etc.
- Intuitive touch-screen or keyboard interface makes it easy to train staff
- Quick customer or product search, with detailed transaction history
- Define your own product groups and categories, set re-order points and target stock quantities
- Print product or customer bar-code labels for accurate inventory management and quick check-out
- Select from a wide variety of POS equipment to simplify operations and increase efficiency
- Integration with Accounts Receivable enables charges to student debit or credit accounts
- Integration with Accounts Payable streamlines purchasing and receiving process
- Integration with General Ledger posts sales and inventory transaction data
