

## *Pesticide Residue Analytical Services*

*Researching and Providing Solutions for the Future!*

### *Quality and Excellence in Analytical Support*

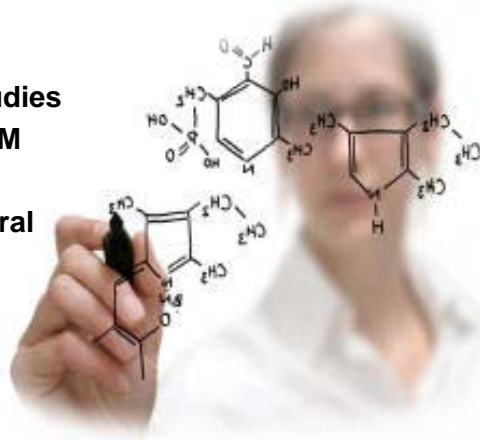

**ADPEN** is a contract analytical laboratory servicing the Agrochemical industry for over 20 years. Our staff of well-trained professionals are experienced in pesticide residue chemistry and ready to help get your toughest projects completed.

**ADPEN** is at the leading edge of technology utilizing the latest in instrumentation such as: LC-MS/MS systems (Agilent 6490 Triple Quad, AB Sciex 5500 Triple Quad, API 4000QT, API 4000, API 3000), HPLC systems (Agilent 1100, 1200 and 1290), and GC, GC/MS systems (Agilent 6890/5975). We also utilize the Dionex Accelerated Solvent Extraction (ASE) system and Bio-tek immunoassay systems.

Our facilities have been inspected six times by the EPA with no findings ever reported. Our laboratories are fully compliant with FIFRA GLPs and have NELAC accreditation. The majority of our clients are well-known companies from around the world.

**ADPEN** specializes in these analytical services:

- Residue Chemistry, RAC Studies, Soil Dissipation Studies
- Independent Lab Validations (ILV), PR-88-5 ILV of ECM
- PAM Multi-Residue Methods (MRM)
- Environmental Fate, Method Development, Agricultural Commodity Screening
- Community Water System monitoring
- LC-MS/MS, HPLC, GC/MS, GC
- Hazard Evaluation, Market Basket, Task Force
- Food Safety and Nutritional Safety.
- EPA method analysis

We comply with EPA, FDA, EC, OECD and Good Laboratory Practices (GLP) Guidelines.
