

THE ROLE WE PLAY WITH SHIPYARDS

We are a proven resource for our global shipyard clients. LinRich Solutions works closely with your subject matter experts during rig design and construction to ensure that newly built drilling rigs and retrofits of older vessels have properly addressed all pressure control equipment system interfaces and that systems are properly integrated with the rig. We understand the critical timelines associated with outfitting and delivering new semisubmersibles and drillships to clients around the world. As experts in BOP and pressure control systems design and operations, LinRich Solutions is your source for proven expertise to ensure that the pressure control systems being specified for your vessels will comply with your client requirements and all applicable regulatory requirements. We are located in Houston Texas, so we are in immediate proximity to many of the world's leading well operators as well as pressure control equipment manufactures. We are your eyes and ears on the ground to ensure that clients are satisfied with your pressure control systems and to ensure that the specified equipment will function properly.

"For your most challenging deepwater pressure control equipment challenges, put LinRich Solutions to the test"
