

# LinkedIn Learning Microsoft Azure Certification

## About LinkedIn Learning

LinkedIn Learning is an ed-tech website which is a subsidiary to LinkedIn. It is an online platform that provides video courses on software, business, and creative skills. It was founded back in 1995 and was known as Lynda.com. Back in 2016 when Microsoft acquired LinkedIn, it was renamed as LinkedIn Learning.

## Microsoft Azure and its Certification

What does a computer do? In simple layman's terms a computer does three basic actions, store, process, and compute. The rate at which the market is growing, it is becoming increasingly difficult to manage these basic three actions. The organizations require faster data analysis, high-level graphics rendering, and high-level storage. There are two choices available at this point, either buying additional hardware, or shift to cloud.

The obvious answer? Cloud computing, putting the business on cloud. On-demand delivery of IT-services online on the go. Zero hustle compared to maintaining physical data centres and servers. An efficiently low cost, more secure and most importantly remote access from anywhere that has an internet connection.

Microsoft Azure- It is an open and flexible cloud platform dedicated to manage Microsoft data centres. It enables users to build, deploy, and manage applications across massive, global network. Seamless hybrid cloud services are Azure pro call. Enterprises can integrate onsite servers with cloud instances with Azure. Open source support working on any language and framework. Hence, businesses can build their application the way they want, from wherever they are.

## Azure Certification Benefits

- Microsoft Azure offers nine profile-based certifications. Hence, it will not only make the certified versatile in his/her role but also in the chosen industry.
- This kind of certification require quite a lot of commitment, therefore, individuals or enterprises with such certification are highly valued in the market.
- The future of cloud computing seems a in a clear peak at this moment, with estimated 83% of workloads on the cloud by the year end.
- The future of cloud computing seems a in a clear peak at this moment, with estimated 83% of workloads on the cloud by the year end.
- With the higher demand for cloud computing professionals, better compensation packages are expected all over the world as compared to other IT fields.

## Our Promise

As we discussed about cloud-based IT- services, this calls for particularly skilled and highly efficient set of employees. Therefore, there is a constant demand for trainings and re-skilling of the industry people. With this growing demand, combined with the globalisation we needed to re-think our traditional methods of trainings. Cloud or online training programs. These programs are readily available and aims at a vast section of crowd sans the chaos of physical set-up. These not only provide hustle-free labs but also makes it available to people located remotely.

We in Nuvepro strive to provide the industries with best in class support for Microsoft Azure Certification Labs.
