CERTIFICATIONS ACCREDITATIONS

Radian Compliance, LLC applies its 100% successful methodology to assist clients with ISO management systems standards and regulatory frameworks to maintain compliance or obtain certification. Radian Compliance supports its clients with ongoing knowledge and consulting with evolving legal, regulatory and contractual compliance requirements. Radian Compliance, LLC is a **WBENC certified Women Business Enterprise and Woman Owned Small Business, a CMMC-AB Registered Provider Organization™ and an ASIS Preferred CPE Provider.**

The Radian Team supports and are recognized as subject matter experts in the following standards and frameworks:

Solution	Formats Supported
Management Systems	ISO 9001 ▪ ISO 22301 ▪ ISO 31000 ▪ ISO 28000 ▪ ISO 14001
Information Security, Cybersecurity & Privacy	ISO 27001 ▪ ISO 27701 ▪ CMMC ▪ NIST ▪ HIPAA
IT Service Management	ISO 20000 ▪ ITIL
Private Security Companies – Land & Marine	ISO 18788 ▪ ANSI/ASIS PSC.1
Compliance Assessment & Program Development	Workplace violence prevention programs ▪ Physical security assessments ▪ ITAR/EAR

DIFFERENTIATORS

Our consultants are known and respected internationally. We participate in Standards Writing Committees and speak at numerous conferences both nationally and internationally. We sit on Boards such as the ASIS International – Professional Standards boards. We are recognized by major ISO Registrars as an Associate Consultant Partner. We have team members strategically located throughout the U.S. with a strong base in Northern Virginia to support our clients locally whenever possible.

With constantly changing supply chain dynamics, our clients recognize that certification to an **international standard** is sometimes the difference between being awarded a new contract and being shut out of the bid process altogether. So, what's the best approach to get certified (time, cost, value add to a client's organization)?

The Radian time tested phased approach involves the following activities:

1. **Scope Identification, Assessment and Gap Analysis** against the standard or framework.
2. **Implementation and Education** to gaps, goals and objectives as defined by the requirements of the Standard and client's business and customer needs.
3. **Internal Audit** to support required internal audit activities as internal auditors or to support client's qualified internal audit resources.
4. **Certification Support and Ongoing Maintenance** assistance during certification audits and support during surveillance audit years.

THE KEY

The key to our client's success is that leadership has made the commitment and supports the resources and organizational changes required for certification or compliance. While other competitors may offer an "ISO in a box" approach, our methodology ensures that organizations understands the requirements upfront to create an effective and sustainable management system that makes sense for their business. The Radian team brings to the engagement the knowledge and expertise in assessment, implementation and internal audit. **Our client's get it right the first time.** We have years of solid experience in the standards and frameworks we support and, in many cases, help to write the standards themselves.

PAST PERFORMANCE

Our national and multi-national clients have been 100% successful in attaining their initial certifications. We have assisted many of our clients in obtaining multiple certifications. Supporting integrated management systems is a specialty of our team. We have also supported our clients to integrate compliance frameworks such as HIPAA into their Information Security Management Systems.

Our clients' industry sectors include but are not limited to: Federal Contracting, Product & Software Development, Energy, Advertising, Health IT, Telecommunications, Printing, Managed Services, Banking, B2B and B2C.
