Patient's Name: _____ App't Date: _____ Time: _____

Indication: Infertility Other : _____ Diagnosis: _____

Notes: _____

CT - SCAN - HIGH RESOLUTION LOW DOSE*

COMPUTED TOMOGRAPHY HYSTEROSALPINGOGRAM (CT HSG)
HSG - CT PELVIS WITH CONTRAST

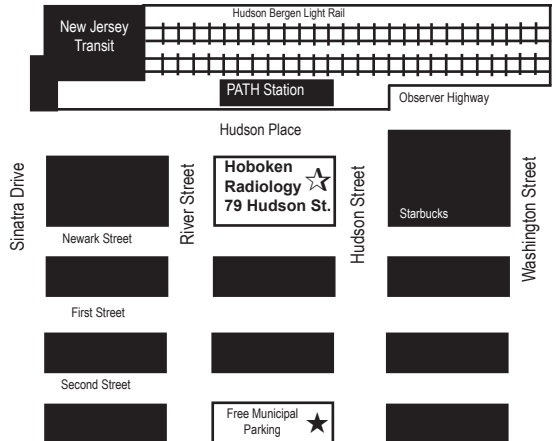

PATIENT INSTRUCTIONS

- If you are pregnant or think you are pregnant, this procedure cannot be done at this time.
- Inform us of any allergies, especially iodine or latex.
- Exam must be done 7 - 12 days from the start of the menstrual cycle.
- No intercourse and no douching on the day of exam
- You should not be bleeding at the time of the exam.
- Arrive on time for your appointment
- On the day of the procedure, you may have meals, but eat lightly.
- During the procedure, some menstrual like cramping may occur. This discomfort can be lessened by taking 400-800 mg of ibuprofen (Motrin, Advil, Nuprin) one to two hours prior to the exam.

***ALL CT SCANS UTILIZE GE ASIR TECHNOLOGY FOR SIGNIFICANT RADIATION REDUCTION.**

Please bring your prescription and insurance card.

If you are unable to keep your appointment, please notify Hoboken Radiology 24 hours in advance.

Validated parking available at Municipal Parking Garage at 215 Hudson St. Between 2nd and 3rd.
