

MICROSOFT
AZURE SECURITY TECHNOLOGIES **AZ-500**

Sanisoft
information technologies

COURSE OVERVIEW

In this course students will gain the knowledge and skills needed to implement security controls, maintain the security posture, and identify and remediate vulnerabilities by using a variety of security tools. The course covers scripting and automation, virtualization, and cloud N-tier architecture.

DURATION: 40 HRS | EXAM CODE: AZ-500

COURSE PREREQUISITES

- Microsoft Azure Administrator Associate Training Attended

COURSE OBJECTIVE

- Describe specialized data classifications on Azure
- Identify Azure data protection mechanisms
- Implement Azure data encryption methods
- Secure Internet protocols and how to implement them on Azure
- Describe Azure security services and features

COURSE OUTLINE

- Module 1: Identity and Access
- Module 2: Platform Protection
- Module 3: Security Operations
- Module 4: Data and applications

TARGET AUDIENCE

Students should have at least one year of hands-on experience securing Azure workloads and experience with security controls for workloads on Azure.
