

INTELLIGENT VIDEO SURVEILLANCE CLOUD

## RealCloud

Realwave combines your video with data points such as cash registers, sensors & video analytics and extracts information you care about the most. Our platform increases operational efficiency, reduces shrink, improves safety, marketing and more. Deep video and data integrations provide powerful insight to exceptions you define. Our deep learning engine can expose exceptions that were not defined, that may be of interest or require action.

Our hybrid-cloud approach leverages existing infrastructure and enables remote access from any device, anywhere.

### Key Features

- ✓ **POS Integrations** brings operations together with timely alerts from POS provided with connected video.
