

THE NEW YORK BLOWER COMPANY

Welding and assembly operations.

Product research center.

Headquarters—Willowbrook, Illinois.

The New York Blower Company is a charter member of the Air Movement and Control Association International [AMCA], which was founded to establish test standards for air-moving equipment.

MEMBER

LAB

New York Blower's AMCA-accredited laboratory and research center ensure the company performs to the highest standards in product development and research including sound, air performance, vibration, finite element analysis, and speed-testing.

OUR COMPANY

In 1889, two brothers—J.W. Mathis and August Mathis—opened a sheet-metal shop on the South Side of Chicago and formed Mathis Brothers Company. They designed and installed heating and ventilating systems.

In 1904, the brothers bought The New York Blower Company, a fan manufacturer founded in 1893. The plant was moved from Bucyrus, Ohio, to La Porte, Indiana, in 1919. The New York Blower Company was one of 12 founding companies of the National Association of Fan Manufacturers, the earliest predecessor to the Air Movement and Control Association International.

In the 1950s and 1960s, the company expanded its presence from regional to national through the development of an extensive network of sales representatives. Today, that presence is world-wide with over 200 representatives, partners, and licensees established around the globe.

Spanning the decades since 1889, The New York Blower Company has been designing and building fans and blowers to move air in all types of commercial and industrial applications. Today, New York Blower has one of the most comprehensive lines of fans and blowers in the world, with literally thousands of designs and models available.

COMMITMENT TO TECHNICAL EXCELLENCE

Consistent capital investment has resulted in the most modern production equipment and research facilities in the industry. This has allowed New York Blower to provide an unmatched combination of technology and manufacturing expertise in its products. New York Blower fan designs provide the highest aerodynamic efficiencies compatible with specific systems and gas-stream requirements.
