

Discover the Pattern, Anticipate the Future

EIA INSIGHTS July 18, 2019

Natural Gas

Injection at Expectations

The EIA reported a 62 Bcf storage injection for the week ending July 12, 2019. The injection was above the average for this week of the year, 45 Bcf, and close to the average of expectations, 61 Bcf.

Storage at 2,533 Bcf is 284 Bcf above inventories for this time last year and 143 Bcf below the five-year average. Tropical storm Barry caused a decrease in natural gas supply and at the same time the hot weather increased power demand so prices rallied through last Friday. However, prices have declined over 16 cents this week mostly due to new forecasts of cooler weather for the last 10 days of July. We expect prices to continue to react to changes in the weather forecasts.

To see what the FA platform can do for you [sign up](#) for a webinar and free trial on our website or contact one of our team members.

Benefits of FA:

- Easy to use, web-based and menu driven platform.
- Extensive history of data.
- Superior graphing capabilities
- Competitively priced.
