

07.20.2015 Meeting  
Wickersham Building, Darrow School  
Attendees: Craig Westcott (Secretary), David Farren  
Call to order 6:30 pm  
Adjourned at 8:00 pm

-Select site(s) and dates for initial inventory work

Sites: Focus on sites that have high potential to contain water resources, specifically woodland pools, wetlands, and ponds. Cross-reference these with landowners willing to have their land inventoried.

Dates: Beginning with Wednesday September 2 and occurring at least every Wednesday thereafter.

Program: In the fall, Darrow School students will create inventory templates and conduct visits to selected sites to perform on-the-ground assays of natural resources. In the winter, students will use aerial photographs and existing maps to verify on-the-ground data and assessing topography and other features in order to select additional sites for inventory.

-Plan to present budget request to Town:

FY 2015: Petition that a sum of un-expendable funds, if available, be allocated to the CAC for the Natural Resources Conservation Plan (NRCP).

FY 2016 and beyond: Petition that a sum in the Town budget be allocated to the CAC annually

**The next meeting of the New Lebanon CAC will occur on Monday August 10, 2015, at the Samson Environmental Center at Darrow School, 6:30-8:00pm.**
