

QUARC Benefits

Unified Clinical Communications

- Simplify communication workflows
- Promote efficient communication
- Greater staff productivity

Routing and Escalation

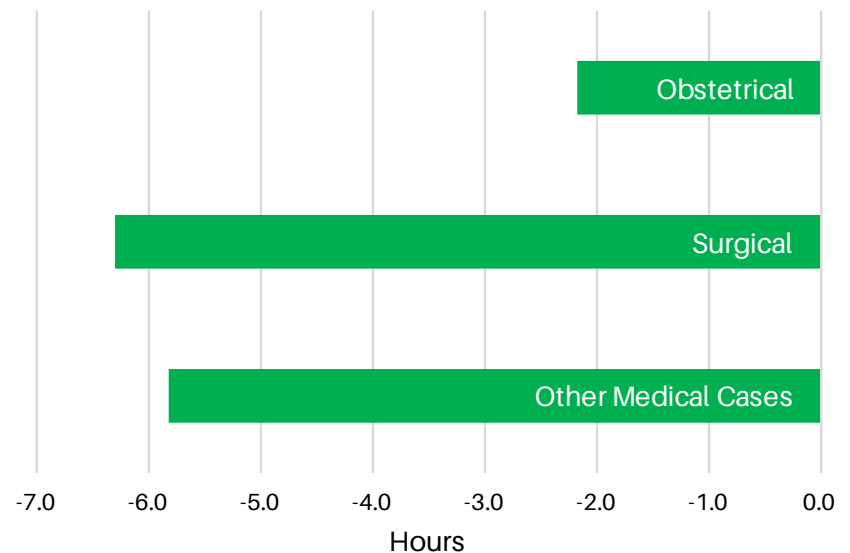

- Decrease latency of information
- Reduce response times
- Enhance coordination of care

Reporting and Transcripts

- Focus case management

Measured Impact

Change in Average Length of Stay
(Pre/Post QUARC Implementation)

Note: Analysis included 1,640 patients covering 5,714 in-patient days (ALOS=3.48 days). "Other Medical Cases" was defined as any discharge with a DRG that was not related to cardiovascular or infectious disease process.
