## BakeMax BMTXM Tortilla Press

The BakeMax BMTXM commercial manual dual-heat dough press is perfect for medium to high tortilla volume production. With the large 16"x20" dual heated platens, you can press, flatten, or par bake 4-6 tortillas in seconds. The bottom platen is lightweight and easily swings out so that you can quickly load and unload. The BMTXM is an easy, affordable way to improve your production time as well as your finished product.

The BMTXM Dual Heated Platens can help activate yeast for faster proofing and par baking. Pressed dough keeps air in the crust, unlike sheeted dough where the air is forced out of the crust. The BMTXM offers your Tortilla dough operators the ability to speed up your production with faster pressing times. Operators can consistently press thinner products faster than traditional methods.

\*\* Due to continuous product improvement, specifications are subject to change without notice.
