Jeremy Goodsell

Neel and his dedicated team of family, friends, physicians and very successful retirement community owners have been working around the clock to provide Perth and surrounding area with the most healthcare focused and passionate retirement community in the area. As a senior focused moving service provider I have been fortunate enough to meet and build lasting relationships with many small, medium and large retirement community owners from Ottawa to the GTA and you can always tell the difference between business and passion. Make no mistake, passion will always create the best result and while Neel may mean business, senior healthcare and quality of life is his passion. I look forward to opening day!

Patti Jordan

Perth Downtown Pharmasave's staff are very excited to be working with Dr. Chadha and the Lanark Lifestyles team. We look forward to providing services to the residents of this beautiful new retirement residence in Perth!

LANARK LIFESTYLES
— RETIREMENT RESIDENCE —

OUR STORY

Dr. Chadha (Neel) and Wit Lewandowski met through family friends and began to meet regularly to play tennis. During their off-court banter, Neel would sometimes discuss his experiences as a house physician at various retirement homes. It was during one of these discussions that he expressed how he felt the current standard of care for seniors warranted many improvements.

Wit, a pharmacist by trade who already had experience operating retirement homes in Ottawa and Belleville, explained the ways that he had already raised standards for seniors under his care. Intrigued and inspired, Neel began to raise the topic more often and ask more questions.

One day, in the spring of 2017, Neel asked Wit to go for a coffee. Accustomed to meeting on the tennis court, Wit knew that Neel was up to something.

During this meeting, Neel announced that he wanted to build and operate a retirement home—but there was a catch. He also told Wit that he wanted more than advice to make it happen. What about becoming partners?

By channelling their medical, pharmaceutical, entrepreneurial and senior care experience, think of how well they could raise the benchmark for senior care as a united force.

Wit could see that Neel wanted to make a difference and they began to work on a plan. Today, they are bringing this plan to life by building Lanark Lifestyles in the heart of Lanark County.
