

MAINTENANCE TECHNICIAN

JOB DESCRIPTION

A Muffin Mam Maintenance Technician is responsible for the general upkeep of our production facility. This person is skilled in a variety of areas including plumbing, carpentry, and electrical systems. The general duties of this position include inspecting buildings, maintaining inventory, and scheduling repairs.

This position is for 3rd shift work. The shifts are 8 hours each (from 10:00 PM to 6:30 AM), 5 days a week (Sunday through Thursday). Some overtime may be required.

BASIC SKILLS OVERVIEW

- Strong electrical background for equipment in new plant
- Broad range of abilities
- Troubleshooting skills to fix circuit or electrical shorts
- Experience in food manufacturing and/or production is a preferred, though not required

POSITION REQUIREMENTS

- 40% Electrical and 60% mechanical
- PLC experience required (preferably with Allen Bradley PLCs, drives, and HMIs); need to be able to interact with HMIs to troubleshoot
- Robotics experience a plus
- Understanding of blueprints and schematics as this is done daily
- Complete understanding of 480V, 115A wiring diagrams; 240V 3-phase and single phase diagrams; and 24V 3-phase control circuits

COMMUNICATION SKILLS

- Must be driven and have a strong desire to work hard and contribute
- Dynamic problem-solvers and goal of improving overall operations
- Personal pride in work done and a desire to complete tasks correctly the first time
- FIT IS VERY IMPORTANT; must be able to function in current environment with current team
- Team player mentality is required
