

TreeBytes Hierarchy Data Management

Making the Move From DRM ?

TreeBytes:

- ✓ The industry's most scalable and easy-to-use solution for delivering Hierarchy Management Solutions
- ✓ Comes preloaded with the required attributes and validations by subscribing system like (Oracle Essbase, Planning, PeopleSoft, SAP, Cloud ERP, HFM, FCCS).
- ✓ Common enterprise information model provides centralized metadata management, common query request generation, and an Excel like interface for visualization, maintenance, collaboration, and governance features.

TreeBytes Cloud is a platform for change management that aligns and synchronizes enterprise data changes across EPM, ERP and BI reporting systems.

Single Point of Entry for all Enterprise Financial Reference Data

Introducing  TreeBytes

Hierarchy Management for
Cloud & On-Premise
Data Integration

Offered by: **Razza Solutions**

The industry leaders in
Reference Data Management

Any Digital Transformation success will heavily depend on having the ability to manage enterprise reference data!

Reduce Risk

Apply Governance

Realize 20-45% lower IT costs

Our Approach

Razza Solutions proven implementation approach, leading practice templates and accelerators focus on improving the value of Finance through enhanced reporting and analysis, shorter budget timeframes and closing cycles, and increased transparency and control. We do not approach our Oracle Hyperion projects with a "systems only" implementation framework. Razza offers comprehensive transformation by connecting people, process, and technology to achieve more efficient and effective operations.

Our goal is to never start with a blank sheet of paper.

What is the health and quality of your reporting?
