

Bryan Baker, PG

Senior Scientist

HSW is excited to announce that Mr. Bryan Baker, PG, has joined our Tallahassee team! Mr. Baker is a Professional Geologist who spent 33 years with the Florida Department of Environmental Protection (FDEP). During his time at the FDEP, he worked in several regulatory programs, including domestic and industrial wastewater permitting to groundwater and surface water, radionuclide issues, membrane technologies for drinking water, pesticides, water policy and water management planning, and the development of groundwater cleanup target levels.

Mr. Baker began working within the RCRA program in 2003, overseeing permitting and corrective action activities. Within RCRA, he focused on implementing risk-based corrective action within the RCRA framework, coordinating RCRA Brownfield projects, and streamlining the RCRA permitting and corrective action closure process. He brings his solution-oriented management skills and knowledge of the regulatory process to HSW and will be assisting clients in achieving cost-effective solutions for their permitting and remediation projects.
