

Companion® Biological Fungicide WP

Companion® Biological Fungicide WP is a biological fungicide to suppress plant disease. This 100% water-dispersible, broad-spectrum biofungicide delivers disease suppression by stimulating the plant's natural defenses. It also enhances crop fertility which promotes increased plant growth and stress resistance.

Key Benefits:

- Increases a plant's own ability to fight disease and withstand stress
- Resists plant diseases - particularly effective against soil borne diseases
- Works and combines well with traditional pesticides
- Is allowed for use in Certified Organic production

Key Ingredients:

- Unique strain *Bacillus amyloliquefaciens*

Common Diseases Suppressed By Early Application Of Companion® Biological Fungicide WP:

- Anthracnose
- Bacterial Blights
- Cankers
- Mildews and Molds
- Spots and Scabs
- Root/Crown Rots and Damping-Off
