DR DAVID HUGHES

David is a paediatric haematologist and bone marrow transplant physician in the Royal Children's Hospital. Originally from Scotland, he completed his undergraduate medical training in Ireland then trained as a paediatrician in Dublin. He has worked in the Royal Children's Hospital since 2010 during which time he has completed subspecialty training in malignant, non-malignant and laboratory haematology. He is currently a consultant in the Children's Cancer Centre where he provides care for children with blood cancers and bone marrow failure syndromes as well as children undergoing bone marrow transplantation for a wide range of conditions. He has a particular interest in bone marrow transplantation for haemoglobinopathies including sickle cell disease and thalassaemia. He is committed to expanding access to bone marrow transplantation for these patients in Australia, by participation in international trials in haploidentical transplantation.
