

# Solos Endoscopy, Inc. Acquires Assets of CYduct, LLC

Published: Nov 20, 2020

**WESTPORT, CT / November 20, 2020 / [Solos Endoscopy, Inc.](#)**, is pleased to announce that Solos' CEO and majority shareholder, Dominick Gatto, has contributed to Solos the extensive research and intellectual property of CYduct LLC, which he also controls. These assets are pertinent to Solos' future business interests.

CYduct, LLC, formed in 2018, is a development stage company pursuing innovations within the women's healthcare market, primarily breast healthcare and wellness. With these CYduct assets Solos intends to focus on new strategic developments aimed at improving breast health and wellness, which could result in a new testing method that prioritizes clinical integrity and patient privacy and convenience. Incorporating this methodology in a medical device would further solidify our position within the breast healthcare market and complement our current MammoView product line," stated Dominick Gatto, Solos' Chief Executive Officer.

"The technology that CYduct has pursued would enable a physician, for the first time, in a clinical setting to easily record and analyze breast disease biomarkers. Such an analysis of the individualized mammary duct microenvironment chemistry, we believe would add significantly to current breast health risk assessment methods. It would provide physicians with the means to deliver personalized breast health care at its earliest possibility, potentially enhancing the lives of millions of women", said Mr. Gatto
