The airport agreed with all four of CliftonLarsonAllen’s recommendations. The recommendations and the airport responses from the examination report are summarized below.

**Recommendation 1**
We recommend that DEN enhance the internal controls surrounding document retention to ensure compliance with policies. This can be accomplished by improving checklists and process flows surrounding documentation retention to ensure all documents are kept in accordance with policies.

**Auditee Response:** Agree

**Recommendation 2**
We recommend that DEN enhance the internal controls surrounding timely reconciling of its royalty revenues related to its oil and gas wells. This can be accomplished by fully implementing the new accounting system, Workday, so that timely recording and reconciling of this activity can take place.

**Auditee Response:** Agree

**Recommendation 3**
Based on the observations noted above related to the LOE, DEN should enhance its analysis of total costs incurred in operating the oil and gas wells on an ongoing basis to determine if there is a business case to keep operating in this manner. The net revenue earned on the selling of oil and gas well production less operating expenses incurred could be considered excessive and should be further analyzed to determine if it is a good use of DEN's resources to continue operations.

**Auditee Response:** Agree

**Recommendation 4**
Regarding the 17 negative cash flow tank batteries (26 wells), DEN should have a well-by-well review with PetroPro of the 20 wells in question with negative cash flows that are not shut-in or temporarily abandoned. This can help determine if they should be shut-in given the decline curves observed on these 20 wells that are included in the negative cash flow tank batteries.

**Auditee Response:** Agree
