

CONSULTING

We provide a comprehensive business and technology advisory service that take our clients from strategy and roadmap to implementation and production.

SUPPORT

We support and provide services specific to configurations, data migrations, Integrations, upgrades, and customizations to address our clients gaps in quick & short timelines.

DEVELOPMENT

We bring in combined experience of more than 20 years of creative technologists in developing custom solutions with Salesforce as an effective platform.

IMPLEMENTATION

We provide end to end full scale Implementation services on salesforce functionalities to help address our clients' business requirements.

DIGITAL TRANSFORMATION THROUGH SALESFORCE

With our deep expertise in delivering solutions built on Salesforce products and our varied experience across industries, as a trusted Salesforce partner, we are positioned to help you implement end-to-end Salesforce transformations. Salesforce ecosystem becomes the front-end for the users with seamless integration to internal and external systems. We enable digital transformation and reengineer processes to simplify the application landscape through retirement of legacy and custom developed systems.

OUR SOLUTIONS TEAM

Our certified team of technology consultants, advanced Salesforce architects, administrators and developers, with advanced degrees in their fields have led the implementation of Salesforce products that have spanned multiple clouds, providing a 360° view of the customer. Backed by deep expertise and domain knowledge, we have the ability to hit the ground running on day one.

WHY US?

RAPID POC DEVELOPMENT

We enable rapid validation of your business use cases using Proof-of-Concept prototype using the Salesforce suite of products.

SOLUTION EXPERTISE
