

Coronavirus (Covid 19) Guidance and Infection Control Measures

At Total Med Solutions, we take your health seriously. We have taken the necessary measures to protect your health as well as the health of our TMS family. The following guidelines are now in place at our clinics and we encourage you to join us observing these guidelines in order to stop the spread of this virus. Our goal is to continue providing you with excellent service in the most socially responsible manner.

We have enhanced our cleaning protocols as recommended and authorized by the CDC and World Health Organization. In the office we provide hand sanitizer at reception areas & treatment rooms and will continue our regular deep cleaning of all surfaces.

We ask that our patients follow current best practices including, but not limited to:

- Washing your hands frequently with soap and water for at least 20 seconds or using a 60% alcohol-based hand sanitizer
- Avoid touching your eyes, nose, and mouth
- Avoid close contact with people who are sick
- Staying away from large crowds of people when possible
- Stay at home when you are sick or feeling sick

We will remain vigilant in assessing our facility, staff, and patients daily. If you have any questions or concerns, please call us and/or let our providers know and we will address them to the best of our ability.
