

**DELEGO**

A division of 

# Senior Software Developer

**Location: Kitchener, Ontario**

**Full time**

Delego builds cloud-based enterprise solutions to help enterprises running SAP ERP be at the forefront of e-payments with easy integration and total security. Founded in 1997 as an SAP consulting business, Delego has evolved into one of the largest providers of SAP-integrated payment solutions. Today, we help world-leading companies like SAP, L'Oréal, Maui Jim, The Globe and Mail, Descartes, Merck, Hilti and many others expand their digital payment capabilities.

We are an established company headquartered in Kitchener in a bright and scenic location overlooking the downtown core.

## What you'll do

Seeking a full-stack developer to work on everything from web-based front ends to back end services hosted in the cloud, along with integrations to leading ERP systems and payment processing gateways.

The main technologies we are developing in are Java, Java EE and Angular 4 for deployment to an AWS cloud environment. As a member of our product team, you'll work independently and with others to design, develop and deliver features that set us apart from the competition.

### Your key responsibilities will include:

- The design, development, unit testing and documentation of key features that will evolve our product offering
- Collaborating with other team members on the scoping and sizing of proposed product changes
- Developing and delivering patches to support our existing customer installations and working to address bugs as they arise

## What we're looking for

We are looking for a smart, self-motivated, success-oriented individual to join our growing team of professionals.

You've worked in a software development role for over two years, and you know what it takes to deliver an enterprise-class product that meets your customer's needs on time and with high quality.

You're an excellent problem solver who knows how to manage your time and prioritize your work, and you enjoy working with others to develop solutions that meet or exceed requirements.

### **Specifically, the ideal candidate should have:**

- 2+ years of Java/Java EE development experience
- Experience building user interfaces with HTML5 and Angular4
- Experience with REST and/or SOAP
- Experience designing, building and deploying to the cloud and AWS in particular
- Practical knowledge and experience with Git/Gerrit and Jenkins
- A Computer Science/Software Engineering/Computer Engineering or related degree

### **Bonus points for the following:**

- Previous experience working in an Agile environment
- Knowledge and/or experience working with SAP

## What's the next step?
