

# Software Quality Engineer

Location: Kitchener, Ontario  
Full time

Delego builds cloud-based enterprise solutions to help enterprises running SAP ERP be at the forefront of e-payments with easy integration and total security. Founded in 1997 as an SAP consulting business, Delego has evolved into one of the largest providers of SAP-integrated payment solutions. Today, we help world-leading companies like SAP, L'Oréal, Maui Jim, The Globe and Mail, Descartes, Merck, Hilti and many others expand their digital payment capabilities.

We are an established company headquartered in Kitchener in a bright and scenic location overlooking the downtown core.

## What you'll do

As a Software Quality Engineer, you will have the opportunity to work with everything from web-based front ends to back end services hosted in the cloud, along with integrations to leading ERP systems and payment processing gateways.

Test automation is a priority for us, so you'll be spending some of your time designing and developing automation scripts to further strengthen our regression guard.

The main technologies we are developing in are Java and Angular for deployment to an AWS cloud environment.

As a member of our product team, you'll work independently and with others to test our existing products and new features that set us apart from the competition.

Your responsibilities will include:

- The design, development and execution of functional and regression testing for feature releases and patches
- Collaborating with other team members on the scoping and sizing of proposed product changes

### Downtown Kitchener

305 King Street West, Suite 302  
Kitchener, Ontario, Canada N2G 1B9

855 407 1198

## What we're looking for

We are looking for a smart, self-motivated, success-oriented individual to join our growing team of professionals.

You've worked in a quality engineer role for over two years, and you know what it takes to deliver an enterprise-class product that meets your customer's needs on time and with high quality.

You're an excellent problem solver who knows how to manage your time and prioritize your work, and you enjoy working with others to produce solutions that meet or exceed requirements.

### **Specifically, the ideal candidate should have:**

- 2+ years of software quality testing experience
- Practical working knowledge of Java, Unix/Linux
- Experience with automated testing and/or scripting tools (e.g. Protractor, bash, python, and others)
- Experience with REST and/or SOAP
- A Computer Science/Software Engineering/Computer Engineering or related degree

### **Bonus points for the following:**

- Practical knowledge and experience with Git/Gerrit and Jenkins
- Experience with testing for cloud-hosted environment and AWS in particular
- Previous experience working in an Agile environment
- Knowledge, and/or experience working with SAP

## What's the next step?

Submit your resume to [careers@delegopayments.com](mailto:careers@delegopayments.com) with the subject line **Software Quality Engineer**.

## About Delego

Delego secures, integrates and enables digital payments for the world's largest companies running SAP. Delego's cloud-based platform secures payment data, eliminating the risk of cardholder data exposure in the event of a data breach and minimizing PCI compliance. Our solutions enable best-in-class payment experiences and integrate our customers' digital payment ecosystem with SAP.

## About EVO Payments, Inc.

EVO Payments, Inc. (NASDAQ: [EVOP](#)) is a leading payment technology and services provider.
