

Increase School Campus Safety with SafetyShield® by Madico®

The safety of students and staff is your primary concern so we would like to introduce you to an easy and cost-effective method of increasing safety on school campuses.

SafetyShield is an impact-resistant laminate that delays entry during an intrusion, active shooter incident, burglary or vandalism. When a window is impacted, SafetyShield film holds shattered glass in place, protecting those inside from flying glass.

SafetyShield integrates with your existing campus security measures and provides 24-hour, passive protection against threats. Protection can be increased with the addition of our patented film attachment systems. SafetyShield is available in several thicknesses depending on your safety and security needs.

SafetyShield Safety and Security Films:

- ✦ Cost-effective solution for existing glass
- ✦ 24/7 passive, invisible protection
- ✦ Available in 7, 8 and 15 mil thicknesses
- ✦ Protects students and staff from flying glass
- ✦ Optional tints and view obscuring films limit visibility from the outside into classrooms and other buildings
- ✦ Delays entry by intruders and increases response time
- ✦ Applied by professional installers in the global SafetyShield network
- ✦ Independently tested to meet or exceed safety glazing and intrusion resistance standards in the U.S. and Europe
- ✦ Brings fire glass up to current safety glazing standard

Wherever there is glass... We can improve it.
