What is ISO 45001:2018 Occupational Health and Safety Management System?

ISO 45001 is a Management System with the purpose of preventing work-related injuries and illness by providing healthy and safe workplaces. Occupational Health and Safety (OHS) is an integral part of every Organisation. ISO 45001:2018 is the first internationally recognised framework for healthy and safe work environments, combining best practices from around the world. More than 10,000 Organisations are already certified and over 500,00 Organisations are expected to take up this Standard within the next decade.

Let us help you to implement this new OHSMS that will make you stand out as an industry leader.

What are the Benefits of implementing an OHSMS?

ISO 45001:2018 will help you to manage risks and improve performance through the implementation of effective policies and objectives with the following flow-on effects:

- **Implementing best practice Health and Safety Standards**
- **Confirms that Organisation complies with regulations**
- **Reduction of incidents and accidents**
- **Promotes continuous improvement**
- **All levels of Organisation are involved**
- **Internationally recognised Standard**
- **Ensuring peace of mind**
- **Third-party audits**

How does an OHSMS apply to my Organisation?

Implementing an OHSMS will help your Organisation to identify hazards, determine who might be at risk, and decide on precautions and controls. ISO 45001 will not only help your Organisation to comply with current legislation but will instil best practices with a focus on continuous improvement. This Standard will result in the reduction of incidents and accidents within your Organisation and ultimately has the potential to save lives.

More than 7,600 people are dying due to work-related accidents or diseases every single day!

Do I need to Certify my OHSMS?

ISO certification is optional, however receiving accreditation for your OHSMS will demonstrate that your Organisation promotes a safe and healthy workplace environment. The certification process consists of a third-party auditor reviewing the implementation processes laid out in the OHSMS. The auditor will provide certification if those processes are compliant with ISO requirements.

Note Kaizen Consulting does not provide ISO 45001 certification.

5) Certification

At Kaizen we offer:

Expertise

Fixed fees

Realistic timelines

Working around your schedule

Support and Guidance through ought the process

Adaptation of Standards to suit your company

Development of efficient and practical processes

What is the Implementation process of ISO 45001?

Kaizen Consulting will support you in developing an OHSMS that suits your Organisation by integrating existing processes and plans with ISO requirements. We will help you to define Interested Parties, expand the scope and the context and strengthen the planning component of your Management System. Once procedures are defined, each of these processes then needs to be communicated to staff at all levels of your Organisation. Internal audits will ensure that control and management mechanisms are in place, allowing for the ongoing success and continuous improvement of your OHSMS. Certification will demonstrate that your Organisation successfully implemented the Management System.
