

# Drinking Water Watch

Drinking Water Watch (DWW) is a tool provided by the NC Department of Environmental Quality that lets the public view information about drinking water quality in public water systems. This information includes:

- Population served
- Source of the water (groundwater or surface water)
- Water system facilities
- Sampling records reported to DWW
- Water violations record
- Important contact information

Drinking Water Watch can be accessed at <https://www.pwss.enr.state.nc.us/NCDWW/>

## How to Search for Your Public Water System

- If you know the name of your water system, type in the name “Water System Name” and hit search for water systems.
- If you know that a private/for profit company provides your water, type that company’s name under “Company Name” and hit search.
- Tip: If you do not know the name of your water system, check your water bill for this information. You can also type in partial names or narrow down the options by limiting the system type, county, or source water type.
  - If you are trying to find the water system that provides water to your home, select Community under “Water System type.”
  - Your landlord may manage a water system for your community. Try typing your community’s name into the search field.
  - Oftentimes, mobile home parks are abbreviated as MHP.

Water System No.	Water System Name	Type	Status	Pri. City Served	Pri. Src. Water Type	Owner Name	Date of Last Sanitary Survey
