## REPORTS

Once you've identified your system name, you can click on the "Report" link or the Water System No. to find additional information.

## GET STARTED WITH DRINKING WATER WATCH

Drinking Water Watch is a virtual tool provided by the NC Department of Environmental Quality's 'Public Water Supply Section' (PWSS)

This search engine allows customers of public community water systems to generate reports and access information on their water utility.

\*Note: This tool does not provide information on private wells.

- Water Test Results
- History of Violations
- Source of Water (groundwater or surface)
- Filtration Methods for Community Wells
- Contact Information for Your System
- Population Served by the Water Utility

- Type the name of your water utility (Town of \_\_, City of \_\_, etc.) under "Water System Name" and hit search to generate the report.
- You can easily find the name of your utility on your water bill!
- If you live in a community where your landlord manages the water system, like a Mobile Home Park, you can also type your community's name into the "Water System Name" field.  
*Example: Tar Heel Mobile Home Park*
- If you are served by a corporate water utility, like Aqua NC or Carolina Water Service, you can search for your system by filling in "Company Name".

# ADDITIONAL INFO

**Drinking Water Branch**

## CONSUMER CONFIDENCE REPORT

The Consumer Confidence Report, also known as a water quality report or a drinking water quality report, provides important information about the quality of the water utilities provide their customers. The U.S. Environmental Protection Agency and the State of North Carolina require all drinking water providers to publish a CCR each year for the water quality of the previous year.

- To access your CCR, click the “CCR Report” button at the bottom of the page.
- From here, you’ll need to enter your water system number which can be found on the water system report.
- Select the year you’re interested in and click “Generate Report.”
- The report includes the information available in the PWSS database.

*If your report is not available through this tool, contact your water utility directly for the information!*
