

Monthly Meeting Schedule – Nov 20, 2021

(Subsequent meeting: Dec 18, 2021)

*“Share what you know,
Learn what you don’t.”*

Dedicated to providing computer information and assistance to computer users, IT professionals and small business owners.

User groups provide an opportunity to network with other computer users and IT professionals. We offer many Special Interest Groups (SIGs) that provide tips, tricks and answers to those elusive questions.

Non-members are always welcome to visit and participate in two SIG meetings without charge.

**Meetings are 3rd Saturday
of each month**

***During the COVID-19 pandemic, where
SIG Leader(s) find it feasible to do so,
monthly NTPCUG meetings are
converting to online only meetings.***

For further information, see our site:

Internet/Windows Inside-Out

11 :00 – Noon

In November, our discussion topic list includes the following:

- Microsoft’s new advice on running System File Checker (SFC.exe)
- What software actually requires TPM 2.0, and what software can run perfectly well on TPM 1.2?
- Windows 11 shortcomings and how to get around them
- Why I’m sticking with Windows 10

To join Glynn’s meeting, e-mail us at SIGrequests@ntpcug.org with “Internet SIG” in the Subject line. ***(If you don’t see a response in 1 minute, check your online SPAM folder!!)***

Two SIG’s and one Special Presentation plan to meet online this month. **Pre-registration may be required for some presentations**, although very easy to do – just follow the instructions below.

Powershell – 8:00 am – 10 am

For the PowerShell SIG in November beginning at 8:00, we will have a general "All Things Related to PowerShell" discussion in an online meeting format. *Join us !!*

To request to join the GoToMeeting invitation, please e-mail **Larry Weiss** using lfw@airmail.net

Special Presentation – 10:00 to 11:00 am

"Computers to the Moon" presented by Mark Schulman.

How did the United States manage to get to the moon in the 1960s at a time when PCs didn't exist and computers were the size of a small warehouse?

Computers to the Moon examines the history of computers aboard early U.S. spacecraft, leading to the monumental effort to create a computer capable of landing a spacecraft on the moon. Today we tend to believe that computers back then were primitive playthings, it turns out that ingenious, driven engineers and software developers, even half a century ago, could accomplish amazing things.

In Computers to the Moon, you'll learn what they created and how it worked.

To join Mark’s meeting, e-mail us at SIGrequests@ntpcug.org with “Special Presentaton” in the Subject line. ***(If you don’t see a response in 1 minute, check your online SPAM folder!!)***

**North Texas PC
Users Group, Inc.**
