The SMB Landscape ................................................ 44
First, some good news: The 2022 hiring outlook is up, and much improved from last year. In fact, 93% of employers plan to hire this year – including 51% to replace or backfill staff, and 41% who plan to hire for new positions. The problem is that, thanks to fewer active job seekers and the “great resignation,” good talent is getting harder to find, and costing more to attract. As such, recruiters continue to lose confidence in their ability to find the right fit for the third year straight.

Scott Gutz, chief executive officer at Monster

Candidates – whose top wish list items are salary protection, flex work, and financial compensation beyond salary – have the upper hand. However, employers still have an opportunity to reach prospective hires by emphasizing workplace culture and career growth opportunities, which continue to be significant factors driving career decisions. Case in point: 27% of candidates say they are seeking caring work environments, while more than 1 in 5 candidates want skills training and development.

“The marketplace is infinitely more competitive, and employers are willing to spend more money to attract talent,” says Scott Gutz,
CEO, Monster. “Plus, we’ve got this situation where there are not as many candidates and they’re moving around so quickly, so we’re not only concerned about the ability to acquire, were also concerned about the ability to retain.”

In keeping with Monster’s goal to help job seekers and employers navigate a work environment that seems to grow more complex by the day, this Future of Work report delves into the following topics impacting recruiters and candidates in the year ahead:

- The Hiring Outlook
- Competition
- Prioritizing the Right Things
- Return to Work
- Skills Gap
- Diversity, Equity & Inclusion

Among the key findings are these top three challenges identified by employers for the next three years:

1. Finding candidates with the right skills: More than 9 out of 10 employers say they are struggling to fill positions because of a skills gap, and 29% agree that the skills gap has increased compared to a year ago.

2. Work/life balance expectations: From workplace safety concerns to employees getting used to working remotely or having more flexible hours, candidate and employer priorities are getting harder to align.

3. Increased competition: Gutz says his own Monster employees are routinely targeted by the outside world with significant offers. “We’re focused on making sure that we are being competitive from a salary and benefits perspective, but we’re also probably just as focused on the environment in which people work.”

Among the other standout trends based on our global findings:

- Return to work plans are in flux. In fact, 43% of employers think hybrid is the way of the future. “From Delta to Omicron, from announcements about going back to work to the delay of those announcements, there have been changes in employee and employer perspectives on if and when is the right time to go back to an in-person work environment,” says Gutz.

- DEI initiatives have shifted from planning stages to implementation. Nearly 4 in 10 employers cited the need to build a diverse workforce as their top DEI priority for 2022. And 67% of Gen Z recruiters are increasing outreach to outside organizations with diverse talent pipelines to make it happen.

- Job seekers are in the driver’s seat… but may not realize it. Among active job seekers, 26% express low confidence in finding the right job fit, while about one quarter of candidates say they are skeptical of employer promises. “If candidates are focused on what is most meaningful to them, they’ve got a real opportunity to find the right job fit,” says Gutz.

What else do job seekers and recruiters across the globe and all demographics have to say? We invite you to explore the full Future of Work report for more insights that can help prepare you for whatever the next year has in store.
Objective: As a global leader in connecting people and jobs, Monster sought to uncover global trends, challenges and opportunities in the hiring process among employers and employees/candidates.

Employer Methodology:
Monster partnered with an independent research firm (Dynata) to field a 13-minute survey among 3,000 recruiters/those involved in talent acquisition, HR, and/or the recruitment industry globally (US, CA-Canada, UK, FR-France, DE-Germany, NL-the Netherlands, IT-Italy and SE-Sweden) age 25+ years. A sample of n=400 was taken for each country except for n=300 for NL and SE. This survey was conducted Sept 8 to Sept 24, 2021 and has a margin of error of +/- 5% at a 95% confidence level. Responses were weighted by business size, gender, and functional area in order to trend year-over-year.

Employee/Candidate Methodology:
Monster partnered with Randstad’s bi-annual Workmonitor survey and an independent research firm (Dynata) to field a 10-minute survey among those age 18-67 years who are employed for at least 24 hours per week (self-employed people were excluded) globally (US, CA-Canada, UK, FR-France, DE-Germany, NL-the Netherlands, IT-Italy and SE-Sweden). A sample of n=800 was taken for each country except for n=2000 for US and FR. This survey was conducted August 23 to Sept 10, 2021 and has a margin of error of +/- 5% at a 95% confidence level.

Across all research, global averages give equal weight to each country.

GLOBAL DEMOGRAPHICS - EMPLOYEES/CANDIDATES
First, the good news. The 2022 global hiring outlook is positive – and improved from last year. More than half of employers (52%) say they plan to replace/backfill positions, while 41% are hiring for new jobs. This is up from 2021 expectations, which were 47% and 35%, respectively.

But the challenge is that while employers want to hire, their confidence in finding the right fit continues its downward trend for the third year in a row. The big takeaway: hiring managers and recruiters are anticipating stiff competition for sourcing new talent.
The 2022 Hiring Outlook

Around The Globe

Most likely to be replacing or backfilling roles in 2022:

- The Netherlands 66%
- France 57%
- Sweden 56%
- Canada 55%

93% of employers are doing some sort of hiring >> up from 82% in 2021.
These sectors are most likely to expand hiring for new roles:

- Automotive: 60%
- Engineering: 57%
- Retail: 56%
- Insurance/real estate: 55%

10% of small businesses expect to have hiring freezes in 2022.
Confidence In Finding The Right Candidate Is Sinking…

Candidates Struggle To Get Back On Track

Only 22% of candidates feel like they’re getting back on track after last year’s setbacks.

Some groups had a better outlook:
- Blue-collar workers 26%
- 18-34-year-olds 33%
- Tech industry workers 34%

Around The Globe

Which countries’ candidates are back on track?

- US 28%
- France 23%
- Sweden 26%
- Italy 21%
- Canada 24%
- The Netherlands 16%
- UK 24%
- Germany 15%

North America 27% vs. EU 21%
Candidate Evaluation Challenges

2022 Top 3 pain points before the interview

1. Sourcing quality candidates
2. Identifying candidate matches quickly
3. Screening and assessing candidates

Recruiters are struggling before they even speak to a candidate.

Last year, employers’ biggest challenge was assessing candidates during the interview.

Tool Talk

Resume search tops the list of most effective online job board tools (40%), across all markets. Followed by:

- ATS integration: 30%
- Distributing job ads on social media: 27%
Recruiters are gearing up to make some changes in order to stay competitive over the next three years. In some cases, that means being proactive and anticipating what candidates are going to want and need.

The top global initiative for attracting talent and remaining competitive? Changing roles to be more flexible or remote. That’s even above more traditional factors like benefits and salary.

Overshadowing these efforts, however, is candidate skepticism that employers may not keep their promises.
The Race For Talent

Top changes companies are implementing to stay competitive over the next three years:

- Change roles to be more flexible: 37%
- Increase benefits and perks: 35%
- Offer skills training; increase salary and wages (tied): 32%

Around The Globe

Other ways to gain a competitive edge | Where it's popular
--- | ---
Starting bonuses/relocation stipends | US, Germany, The Netherlands, and Italy
Company profit sharing | France and The Netherlands
Increasing Diversity, Equity, and Inclusion | Sweden

Industry Snapshot

Increasing salary and wages is a top initiative for these industries:

- Healthcare (41%)
- Tech (39%)
- Leisure/Hospitality (39%)
**Candidate Skepticism**

24% of candidates are skeptical of promises companies make about job expectations, benefits, perks, and culture.

<table>
<thead>
<tr>
<th>Skepticism by Age</th>

Millennials are the biggest skeptics!
# How To Find Candidates

Employers identified these as the most effective resources for finding quality candidates for their last 3-5 hires:

<table>
<thead>
<tr>
<th>Tool</th>
<th>Talk</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1. Personal connection</strong></td>
<td>34%</td>
</tr>
<tr>
<td><strong>2. Job board posting</strong></td>
<td>29%</td>
</tr>
<tr>
<td><strong>3. Candidate online profiles</strong></td>
<td>28%</td>
</tr>
<tr>
<td><strong>4. Networking</strong></td>
<td>27%</td>
</tr>
<tr>
<td><strong>5. Posting on company/career site</strong></td>
<td>27%</td>
</tr>
<tr>
<td><strong>6. Resume database search</strong></td>
<td>24%</td>
</tr>
</tbody>
</table>

About a quarter of employers are increasing job ads to stay competitive.
Finding the right fit is the goal of both the employer and the candidate, but the survey indicates a disconnect between what’s on employers’ to-do lists for 2022 versus what’s on candidates’ wish lists.

For example, recruiters are really pushing remote flexibility, but that wasn’t as high a priority for job seekers. What candidates want most is salary protection, while that’s lower down on employers’ agendas.

It could be that employers are trying to get ahead of what they think candidates will want after coming off of an odd pandemic year, or… maybe they’re off the mark? Only time will tell.
As you can see, recruiters and candidates are on the same page when it comes to flexible work and paid time off, but their other top priorities don’t align.

Financial compensation beyond salary – 3rd most desired for candidates – doesn’t even appear on the employers’ lists. And where candidates are really seeking salary protection, employers are less likely to be focused on that.

Also on candidates’ wish lists, but not on employers’ to-do lists: *Skills training and development*. More than 1 in 5 (22%) candidates say they want it.
The most important factors driving career choices:

- Compensation: 50%
- Meaningful work: 42%
- Safe environment: 35%

Worth noting: 43% of employers say candidates are asking about safety and health protocols.

Older job seekers more likely to focus on:
- Compensation
- Safe environment
- A workplace in which I can connect with people

Younger job seekers care more about:
- Job flexibility
- Career growth opportunities
- Gaining long-term marketable skills

Trend to watch: 27% of candidates say they are seeking caring work environments
Top Factors For Determining Fit: Same As Last Year

2021
1. In-person interview
2. Resume
3. Previous work experience

2022
1. In-person interview
2. Resume
3. Previous work experience

Fading red flags

*Skills match wasn’t included in 2021

College degree continues to slip in significance – from 7\textsuperscript{th} to 8\textsuperscript{th}.

Culture fit, tech platform experience, and leadership are less important to recruiters this year.
The pandemic has changed how work gets done – maybe forever. Our Future of Work survey found that both employers and candidates have unique visions of what this new world of work will look like. While nearly half of employers think hybrid work is the way of the future – and pivoting in that direction will provide them with a competitive recruitment and retention edge – candidates and employees have other ideas.

One thing is for sure: Hardly anyone expects work to completely revert to how it was in pre-pandemic times.
Has Work Changed Forever?

43% of employers think hybrid is the way of the future

They also say that flex work options:

- give them a recruiting advantage: 42%
- help retain talent

Around The Globe

When it comes to flexible work schedules, a greater percentage of US and UK recruiters say it helps them to retain talent (49% and 48%, respectively).

The Netherlands had the highest percentage of recruiters (32%) who say they’re skeptical that moving to flex schedules would be good for productivity.
Employers Are More Open To Negotiating Schedules

- 53% will allow workdays from home
- 41% would let people choose and change work hours
- 35% may let employees choose schedule outside of normal business hours, but it must be consistent

Virtual Recruiting: Still Here, But Not Loved By All

- 89% are virtually recruiting, but only 19% think it's better than in person

However, the younger recruiters are more likely to think virtual is better than in-person.

- 61% of Gen Z
- 26% of Millennials
- 13% of Gen X
- 6% of Boomers
Whether it’s because of the pandemic or not, employers in this year’s survey said that they are having more of a struggle filling positions because of skills gaps than they did one year ago. IT and strategic planning were the top hard skills gaps identified, while teamwork and communication were the top two soft skills gaps.

To bridge the gap, survey respondents have indicated that they are more open to hiring candidates with transferrable skills and training them. The big problem is that half of employers say job seekers need to do better when it comes to articulating the transferable skills they have.
The number of employers struggling to fill positions because of a skills gap is up 4 percentage points from last year. 29% agree that the skills gap has increased compared to a year ago.

### Industry Snapshot

Industries struggling more with skills gaps

</tbody>
</table>

### Around The Globe

- Germany leads the way in thinking the skills gap is worse than a year ago (35%).
- Recruiters struggle to fill positions due to skills gaps, with the UK struggling the least, at 87%.
### Employers Open To Training

63% of employers are willing to hire someone with transferable skills and train them

50% of employers say candidates need to be able to articulate their skills better

Internal recruiters more likely to train someone with transferable skills than external (71% vs. 58%)

#### Around The Globe

Employers in US, UK, and France are most willing to train, while just 47% of Swedish employers said the same.

<table>
<thead>
<tr>
<th>The most important skills employers want</th>
<th>Soft</th>
<th>Hard</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Teamwork/collaboration</td>
<td>1. IT</td>
<td></td>

<td>2. Strategic planning</td>
<td></td>
</tr>
</tbody>
</table>

| The biggest gaps: for hard skills, it’s a perfect match with desired skills |
|-------------------------------|--------------|---------|
| Soft                          | Hard         |
| 1. Communication              | 1. IT        |
| 2. Problem solving/critical thinking | 2. Strategic planning |
| 3. Dependability              | 3. Operations and computer skills (tied) |

> White-collar industries face skills gaps for the most desired skills: especially for communication (soft) and information technology (hard)

> For blue-collar employers, the biggest gap was with dependability, which they ranked as the 2nd most important soft skill
Planning new diversity, equity and inclusion initiatives was a top priority among global employers in 2020-2021 thanks to global social justice movements that took place. Employers and candidates were hard at work having conversations to create awareness and entered into the planning stages of their DEI agendas.

This year’s survey reveals a pivot toward program implementation, with nearly 4 in 10 employers citing the need to build a diverse workforce as their top DEI priority.
### From Awareness To Implementation In One Year

<table>
<thead>
<tr>
<th>2021</th>
<th>2022</th>
</tr>
</thead>
<tbody>
<tr>
<td>37% of employers reported they did not have a diversity and inclusion strategy</td>
<td>37% of employers say more than ever, candidates expect to learn about a company’s DEI efforts.</td>
</tr>
</tbody>
</table>

**The top DEI priorities:**  
1. Employee training (42%)  
2. Gender pay equity (40%)  
3. Building a diverse workforce (34%)  

**The top DEI priorities:**  
1. Building a diverse workforce (39%)  
2. Gender pay equity (36%)  
3. Creating a system/process (i.e. mentorship programs) (28%)  

This increases to 47% among Gen Z recruiters.

### Recruiting Generations Take Different Approaches

- **Gen Z:**  
  - 53% of Gen Z recruiters emphasize the importance of building a diverse workforce.  
  - And, 67% of them are increasing outreach to outside organizations with diverse talent pipelines to make it happen.

- **Boomers:**  
  - Are the group fighting most for gender pay equity (46% vs. 36% global average).

- **Nearly 3 in 10 Millennials:**  
  - Say publicizing inclusive HR policies is a top method for recruiting diverse talent, more so than other generations.
DEI Employee Programs And Recruitment Strategies Around The Globe

- The overall top area of focus among global recruiters is people of color/ethnic minorities (37%)
- France has the highest number of employers focused on people with disabilities (29% vs. 19% global average)
- Age discrimination has the highest focus among UK and French companies
- The Netherlands has more DEI initiatives for both women (41%) and working parents/caregivers (42%) vs. the respective averages of 32% and 35%
- The UK (27%) and Italy (25%) lead the way for LGBTQIA+ programs compared to 24% globally
- Nearly 3 in 10 US employers recruit or support military, veterans, and spouses
In most cases, global employers are facing a similar set of challenges for the coming year. However, it’s always interesting to see how individual countries stand out when it comes to topics of importance like job seeker confidence, changes in policies and benefits, return to work plans, and more.

Take a tour around the globe for country-specific outlooks.
Job Seeker Confidence Is All Over the map

Confidence is lower among those actively searching

Italy has least confident job seekers, but the most confident recruiters.

More than 1/3 of Italian active job seekers expressed low confidence in finding the right job fit.

96% of Italian employers are confident that they will be able to find the right candidates for open positions, the highest percentage among other countries.

The least confident recruiters are in Sweden, with 1/5 saying they aren’t confident at all.

Globally, recruiter confidence varies by region
What Candidates Want, By Country

Globally, the TOP 5 candidate desires were:

1. Salary protection
2. Flexible work schedules
3. Financial compensation beyond salary
4. Paid time off
5. Remote flexibility

But there were some different Top 5 results when broken out by individual country:

- **Skills training**
  - UK (4th)
  - France (4th)
  - Italy (4th)

- **Family/child support**
  - Italy (5th)

- **Health policies and protocols**
  - France (5th)

- **Gender pay equity**
  - Sweden (5th)
Which Policies/Benefits Changes Are Employers Prioritizing?

The Netherlands: 57% anticipating changing to flex work (vs. 46% globally)

France: 1/3 to offer salary protection (vs. 26% globally)

UK: 17% to offer mental wellness resources (vs. 13% globally)

Sweden: 12% to offer environmental and sustainability initiatives (vs. 6% globally)

Canada: 1/5 to change health policies and protocols (vs. 16% globally)

Effective Resources For Finding Quality Candidates For Last Few Hires

- 44% of recruiters in France used candidate profiles (vs. 28% globally)
- 3 in 10 German employers found email campaigns effective (vs. 20% globally)
- Canada has the highest percentage relying on job board postings (37% vs. 29% globally)
Nearly half of US and UK recruiters said that offering flexible work options helps them to retain talent.

### How global employers envision the Future of Work

<table>
<thead>
<tr>
<th>Most likely to go hybrid</th>
<th>Most likely to be fully in-person</th>
<th>Fully remote</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Italy 63%</td>
<td>1. Sweden 37%</td>
<td>1. Netherlands 34%</td>
</tr>
<tr>
<td>2. UK &amp; Germany (tied, 60%)</td>
<td>2. US 35%</td>
<td>2. US 19%</td>
</tr>
<tr>
<td>3. Canada &amp; France (tied, 32%)</td>
<td>3. Canada 18%</td>
<td>3. Canada 18%</td>
</tr>
</tbody>
</table>

### Candidate preferences:

<table>
<thead>
<tr>
<th>Prefer to go hybrid</th>
<th>Prefer fully in-person</th>
<th>Fully remote</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Most: Sweden 51% The Least: Canada 40%</td>
<td>The Most: France 42% The Least: Sweden 30%</td>
<td>The Most: US 28% The Least: France 15%</td>
</tr>
</tbody>
</table>

The Netherlands 44% say they very often can’t fill a position because of skills gap; much higher than 28% globally.
## WILL GEN Z RECRUITERS CHANGE THE GAME?

Gen Z is more likely to leverage a broader set of tools than older recruiters including:
