

# Mosaic Vaccine Policy

---

The providers at Mosaic Health and Healing Arts endorse the evidence-based recommendations of the Centers for Disease Control, the American Academy of Family Physicians and the American Association of nurse practitioners for vaccinations for children.

We are unable to provide vaccines in our office. For our Medicaid patients, you will need to go to the Health Department for your vaccinations and we will provide you with instructions on how to do that. For our private insured infants, we recommend minute clinic and will give you instructions for how to get them there. There might, however, be a gap of 6 mos in which there is no place to get vaccines for your child unless you choose another doctor's office for care.

We also understand that parents have ultimate responsibility for their children and if you, as parents, decide to do a delayed vaccine schedule or choose not to vaccinate at all, we will continue to give your family care. However, by signing this policy, you acknowledge that you understand the risks of your choice and are willing to take responsibility for these risks. Neither Mosaic or the providers at Mosaic, cannot be held responsible for any outcome associated with NOT following the recommended schedule.

By signing below, you indicated that you have received this document and understand the contents.
