

## PRODUCT INFORMATION

# VAPPRO 50 FOAM TAPE

**Function:**  
Vapour Corrosion Inhibitor (VCI)

**Application:**  
Electronics Enclosures

**Form:**  
Emitter

### DESCRIPTION

**VAPPRO 50 VCI Film Tape** is a grey polyurethane foam impregnated with vapour corrosion inhibitor.

It is designed for the corrosion protection of ferrous and non-ferrous metals in long narrow enclosures.

**VAPPRO 50 VCI Film Tape** comes with a self-adhesive backing and provides up to 2 years of continuous protection.

### FEATURES

- Vapour-phase inhibiting actions protect inaccessible and recessed surfaces
- No spraying, wiping, dipping or surface preparation required
- Protected equipment can be used immediately
- Adhesive backing allows fast no-tool installation
- VCI is self-replenishing
- Easily cut to length for the amount of protection required in various size enclosures
- Effective up to 24 months

### APPLICATIONS

**VAPPRO 50** is designed to protect electrical components, metal parts and other products when placed in non-ventilated enclosures where air exchange is limited. Some examples include:

- Interior of lighting fixtures
- Long tubular products, pipe and vessels
- Completed assemblies, parts and components
- Electrical and electronic equipment and controls
- Marine and commercial electronic equipment
- Interiors of fuse boxes, conduits and wireways
- Motors and mechanical controls
- Tools and spare parts

## DIRECTIONS FOR USE

Cut tape to length required for your application. Make sure the surface of application is dry. Peel off the paper backing and mount tape inside the enclosed space. The adhesive is designed to adhere to uneven and rough surfaces. When mounting is not required, the tape may be inserted in a box, bag, or container with the paper backing left on.

## PHYSICAL PROPERTIES

Colour	Grey
Form	Polyurethane Foam
Size	183cm x 2.5cm x 0.6cm

## PACKAGING

- Case: 4 rolls of 1" x 0.25" x 6'
