

Your Corrosion Solution

PRODUCT INFORMATION

VAPPRO ASC VCI ANTI-SEIZE COMPOUND

Function:
Anti-Seize Lubrication

Application:
Pipe Threads

Form:
Paste

DESCRIPTION

HIGH TEMPERATURE ANTI-SEIZE COMPOUND

VAPPRO ASC is a premium quality, lead-free, anti-seize compound. It is specifically developed to provide maximum protection against galling, rusting and heat bonding under the most extreme conditions of heat and pressure.

VAPPRO ASC compound is uniquely formulated with a non-melt organic clay, contact corrosion inhibitors, vapour corrosion inhibitors, micro-fine copper powder, non-melting high carbon natural graphite and ashless white oil.

This unique combination provides the following properties:

- Reduces wear in areas of high friction
- Reduces torque and eliminates seizing and galling
- Excellent adhering properties to threaded surfaces
- Excellent corrosion inhibition
- Excellent lubrication properties

FEATURES

- Reduces downtime
- Eliminates corrosion
- Facilitates ease and speedy non-destructive repairs
- Provides dry film lubrication
- User-friendly
- Extends shelf life of threading parts
- No pot life and non-dripping
- Protects deep recessed areas against corrosion
- Provides easy removal of threaded parts
- No mixing required
- Does not harden, separate or evaporate
- Wide working temperature range from -20°C to +1100°C

APPLICATIONS

- Pipe threads, nuts, bolts, studs, flanges, gaskets, screws, taps, drills, pump valve packing and valves stems, exhaust manifolds, boilers, heat exchangers, and battery posts
- Can be used as a dry film lubricant
- **VAPPRO ASC** is invaluable to applications where components needing to be disassembled

PHYSICAL PROPERTIES

Colour	Copper
Odor	Odorless
Solid Content Weight	29%
NLGI Grade 2 Penetration (ASTM D-217)	Worked penetration after 60 strokes at 25°C (0.1 mm) 265-295
Dropping Point (ASTM D-2265)	None

PACKAGING

- 0.43kg Can (1 lb.)
- 20L Pail

Manufacturing Facility
1450 Government Rd., West
Kirkland Lake, ON
P2N 2E9 Canada
