Classwork

Monday

## Unit 1 : The Human Body

### "Brain"

Q1: What is cerebrum? What does it do?

Ans Cerebrum is the biggest part of your brain. It helps us to think about things like colours, music, shape, maths, science and language.

Q2: What is the difference between the left side of your cerebrum and the right side?

Left side

Right side

It helps us with

It helps us think

all 'brainy' like

about things like

maths and science.

colours, music etc.

## Unit : 1 The Human Body

### "Heart"

Q<sub>1</sub>: How does your heart pump blood?

Ans: Heart muscles squeeze and relax to pump blood to every part of the body.

Q<sub>2</sub>: Why does your heart beat faster when you run?

Ans: That is because our heart has to pump the blood around our body faster.

## Unit : 1 The Human Body

### " Lungs "

Q1: What is the function of the lungs ?

Ans: They help us to breathe.

Q2: What happens to your lungs when you breathe in and breathe out ?

Ans: When we breathe in and breathe out, our lungs get bigger and smaller.

Q3: Which gas do you (a) inhale (b) exhale ?

Ans: (a) We inhale oxygen when we

breathe in.

(b) We exhale carbon dioxide when we breathe out.
