

The Human Body

CH#01 Class: Three Subject: Science

Worksheet

Q1: Fill in the blanks.

1. **Skin** is the human body's largest organ.
2. A **microscope** is a scientific instrument that makes things appear larger.
3. Skin loses about **30000** to **4000** dead skin cells from its surface.
4. Images are inverted on their way to the **retina** at the back of the eye.
5. The human ear has **three** main sections.
6. **Ear** are the parts of your body that take in sounds and enable you to hear
7. The tiny hairs in the nose called **cilia**.

8. Tongue has taste buds on its surface that let you taste.
9. The tongue is a strongest muscle in the human body.
10. The three smallest bones in the human body are hammer, anvil and stirrup.

Q2: Write “T” for true and “F” false statement.

1. A microscope is a scientific instrument.

T

2. Skin cells do not always grow. F

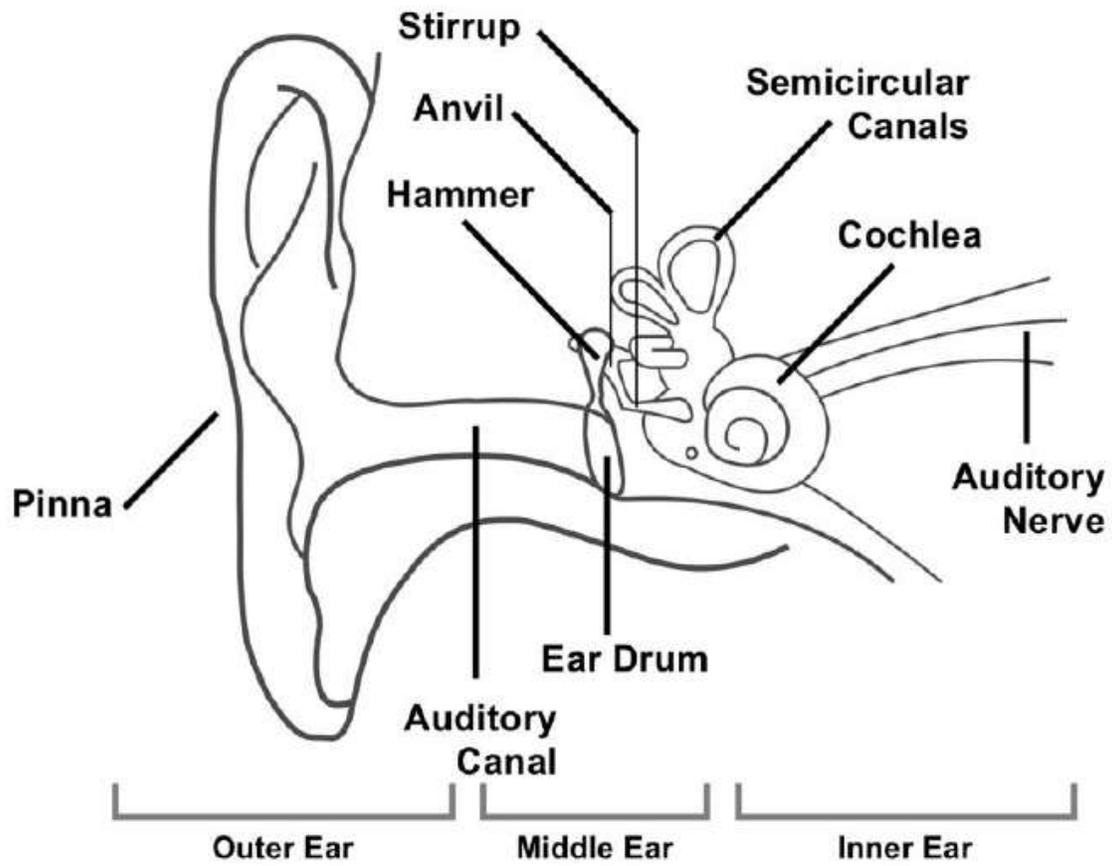

3. Middle ear has three tiny bones. T

4. Tongue helps us to breathe. F

5. Nose allows us to smell the world around you. T

6. The skin provides you with your sense of touch. T

Q3: Label the following diagram.

Short Q/A

Q1: What is a microscope?

Ans: A microscope is a scientific instrument that makes things appear much larger than they actually are.

Q2: What does your skin do?

Skin protects human body parts from diseases, keeps the body at right temperature and gives you sense of touch.

Q3: What do the eyelids and eyelashes do?

Eyelids and eyelashes protect by trapping dust and other tiny particles from entering the eyes.

Q4: What causes you to sneeze?

Ans: You sneeze when the inside of your nose is irritated.

Q5: What are the three smallest bones in the ear called?

Ans: The three smallest bones in the human body are hammer, anvil and the stirrup.

Q6: what are the different sections of the human ear?

Ans: Human ear has three main sections:

- I. The outer ear
- II. The middle ear
- III. The inner ear.

Long Q/A

Q1: What are the important functions of tongue?

Ans:

- I. It helps people talk
- II. It allows you to chew food.
- III. It helps you to swallow food.
- IV. It helps you taste the food you eat with the help of taste buds.

Q2: Write three main functions of the nose?

Ans:

- I. It helps us to breathe.
- II. It allows us to smell the world around us.
- III. It allows us to taste what we eat.

IV. It also moistens and filters the air we breathe.

Q3:What are the different sections of the human ear? What does each section do?

Ans: The human ear has three main sections:

I. The outer ear:

It collects sound as it pass by the ear.

II. The middle ear:

It turns the sound into vibrations.

III. The inner ear:

It receives the vibration from the middle where they are send to the brain then the brain make sense of the sound.
