A laptop can be carried around by one person. It can also work on a battery.

Smaller computers that fit into the palm of our hand are called **palmtops**.

Some of the palmtops can be carried around in our pockets too. They also work on batteries.

This is a **palmtop**.

Palmtop

Tablet Computer

A **tablet computer** is smaller than a laptop, but larger than a palmtop. A tablet computer has a **touch screen**. You can use your fingers or a pen-like device to work on a tablet computer.

All of these computers are also called **personal computers** (PCs). They are personal because they can only be used by one person at a time.

Look at the picture above and fill in the blanks.

Ayesha is working on a **Tablet**, while her mother is working on a
..... **Laptop** Ayesha's brother is working on a **Palmtop**,
while her father is working on a **Computer**
