

## LIONS EYE FOUNDATION 4-C2 2020 REVIEW

In 2020, despite having to cope with Covid-19, the Lions Eye Foundation (LEF) Eye Clinic continued its dedicated mission of restoring and preserving the gift of sight. Even though from mid-March to June 13<sup>th</sup> the clinic operated with a limited staff and only handled emergency cases, a significant number of surgeries, eye injections, laser treatments, and ophthalmic diagnostic services occurred. The following summary illustrates how well the Eye Clinic performed while coping with Covid-19.

<b>Surgeries</b>	<b>New Patients</b>	<b>Eye Injections</b>	<b>Laser Procedures</b>	<b>Ophthalmic Services</b>	<b>Minor Surgeries</b>
198	244	653	211	2,461	12

The total medical cost for the 2020 eye care services was \$5,470,234.

A significant number of 4-C2 patients benefited from LEF eye care. A total of 68 patients from 4-C2 received eye surgeries and 117 new patients were referred during 2020. Of the nine member LEF districts, 4-C2 had the most patient surgeries, 34%, and new patient referrals, 48%. The following pie charts illustrate the considerable benefits received by 4-C2 Lions patients.

The 2020 results are a result of the dedicated efforts of the doctors and staff at the Eye Clinic, and Lions who support the Foundation.

Thank you for your continuing support!

John D. Posey  
Executive Director
