

# ACT NOW TO SAVE BIG!

Install a solar energy system in 2020 to maximize your savings.

The investment tax credit (ITC) allows you to **deduct 26 percent of the cost** of installing a solar energy system from your federal taxes. The ITC applies to both residential and commercial systems, and there is no cap on its value. Beginning in 2021, owners of new solar energy systems can deduct only 22 percent of the cost from their taxes, with the tax deduction declining through 2022.

## THE FOLEY DIFFERENCE

- **Custom power solutions.** Our power solutions are scalable to fit your unique configuration. We can develop a custom power solution ranging from 10kW to 100MW that blends any combination of renewable energy with power from conventional diesel and gas generator sets.
- **Comprehensive project services.** Foley Equipment will support you at every step of your project, including site assessments and project development. We work closely with installers and financiers throughout the project to ensure a seamless experience.

# GAIN ENERGY INDEPENDENCE

## Renewable Energy

Sitruc Pork LLC — North Central, IA

# Ag Investment in Solar

Sitruc Pork LLC

## BACKGROUND

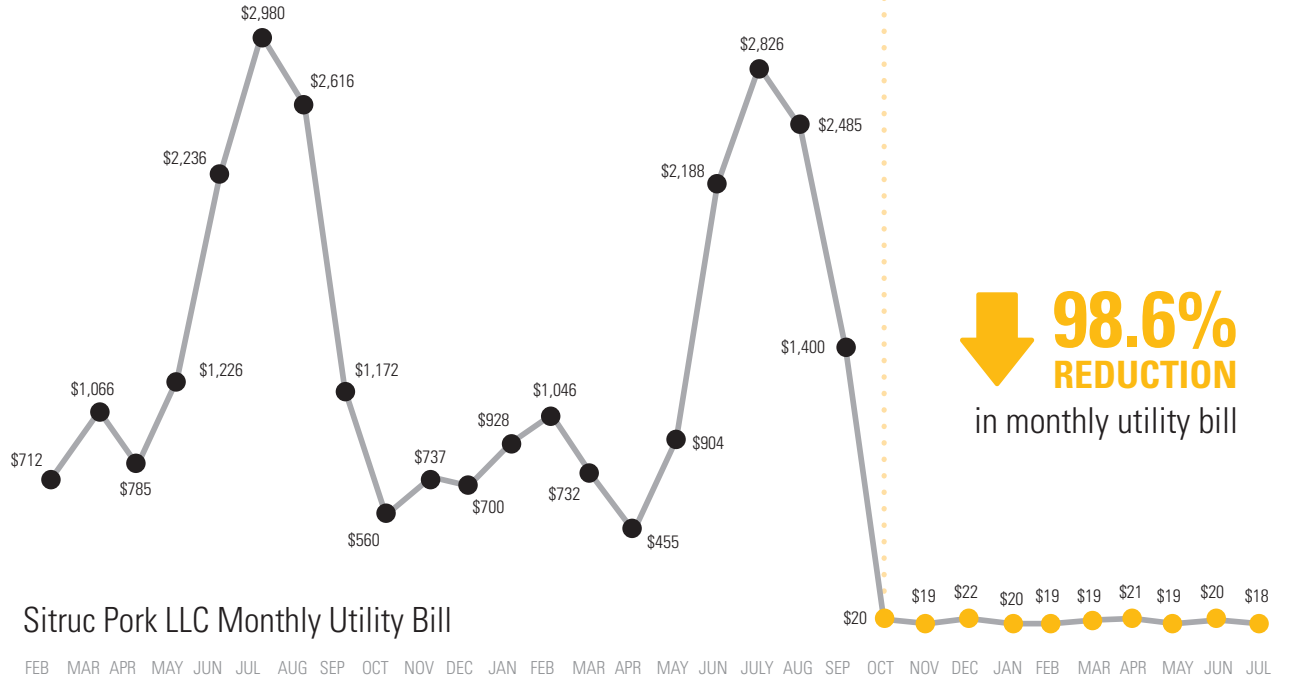

The Rathe family has been in the agriculture business for nearly 140 years. As an owner of Sitruc Pork LLC, Steve Rathe relied on the local utility and backup generator sets to power his hog operation across six sites near Waverly, IA. With utility bills averaging \$1,400 per month, Rathe started looking for an alternative, cost-effective power source.

## RESULTS

After consulting with their local Cat Dealer it was clear that a custom solar panel installation was the solution to providing an efficient, cost effective energy source to the farm. During the fall of 2017 over a ten day period, 810 CAT® fixed, ground-mounted solar panels were installed, decreasing Sitruc Pork's average monthly utility bill by **98.6%**.
