

Drosera Homeopathic Cough Syrup

Mucus expectorant
Anti-inflammatory
Thins mucus secretions
Treats spasmodic cough
Soothes Bronchioles

This is a safe and effective alternative to over the counter cough suppressants or expectorants.

It is particularly safe for infants & children.

Contains water and homeopathic preparations of remedies for cough. Particularly night cough/dry/chronic coughs. Sweetened with sucrose (sugar) not honey.

Dosage:

Under 1 year-Consult

½ tsp 3 x daily

1-3 years-1 tsp 3-5x daily

3-12 years 1 ½ tsp 3-5x daily

12 plus 2 tsp 3-5x daily

Taking 1 dose every 15 minutes up to 3 times is also helpful to shift symptoms quickly and calm a night cough.

Because of the vibrational nature of Homeopathic Remedies do not eat or drink anything within a 10 minute window of taking. Water is ok.

You can add herbs to this syrup and combine with a small amount of water.

Keep in fridge after opening.

Blue Green Lung Formula

This herbal formula is unique to TCM (Traditional Chinese Medicine) because it addresses cough, phlegm and opens the bronchioles (airway) especially for a wheezing cough. Helps drain phlegm out of the body thru the large intestine. The main ingredients are familiar-ginger, licorice and 2 types of dried citrus peels. 3 other unique herbs. A mushroom (poria) and a lily bulb (pinella), which is like an onion and Ephedra (what Sudafed is made from). Herbal lung support without the drying, hyperactive side effects.

This is especially valuable when there is an active, tight wheezing cough. Safe for children. Consult for infants.

Dosage:

Under 1 year- 3-4 drops (1/16 of a tsp 3 x daily

1-3 years-1/4-1/2 dropper or

1/8 tsp 3-4x daily

3-12 years- 1 dropper or ¼ tsp

3-4x daily

12 and Adults- 1-1/2 dropper or

½ tsp 3-4x daily or 3 pills 3

times daily.

Administer to kids in Pineapple, apple juice, Drosera Cough Syrup or Tea with Honey because it is a bit strong and bitter.

Can keep in the fridge after opening. Shake well.
